“L’idea alla base di questi contenitori è stata quella di progettare una superficie che si estendesse fisicamente alle persone. La superficie in rilievo conferisce al prodotto un estremo senso di profondità. Con motivi ripetuti di forme in vetro molto diverse su tutti i lati, la bellezza è apprezzabile da ogni punto di vista. La sperimentazione è essenziale per il nostro processo di progettazione e lavorare a fianco di FIAM ci ispira sempre a creare qualcosa di nuovo. I loro innovativi processi di lavorazione del vetro ci consentono di progettare prodotti lussuosi capaci di generare un forte senso di illusione attraverso l’uso forme inedite. Queste collezioni sono la dimostrazione di come con FIAM siamo in grado di ottenere eleganza grazie all’utilizzo del vetro e scoprire così nuovi lidi in cui approdare con questo magico materiale”.

“L’idée derrière ces conteneurs était de concevoir une surface qui s’étendrait physiquement aux personnes. La surface gaufrée donne au produit une sensation de profondeur extrême. Avec des motifs répétés de formes de verre très différentes sur tous les côtés, la beauté est appréciée à tout point de vue. L’expérimentation est essentielle à notre processus de conception et travailler au côté de FIAM nous inspire toujours pour créer quelque chose de nouveau. Leurs processus innovants de fabrication du verre nous permettent de concevoir des produits luxueux qui génèrent un fort sentiment d’illusion grâce à l’utilisation de nouvelles formes. Ces collections montrent comment, grâce à FIAM, nous pouvons atteindre l’élégance par l’utilisation du verre et ainsi découvrir de nouveaux rivages où atterrir avec ce matériau magique”.

“The idea behind these cabinets was to design a surface that would physically extend out to people. The relief surface gives the piece depth and meaning. With repeating patterns of very different shapes in glass on all sides, the beauty endures from every angle. Experimentation is essential to our process and working alongside FIAM inspires us to create something new. Their innovative glass processes allow us to design luxurious pieces in which we can use shapes to create a sense of illusion. These series are the next example of how with FIAM, we are able to push elegance with glass and discover new places it can take us”.

“Die Idee hinter diesen Vitrinen und Sideboard war es, eine Oberfläche zu entwerfen, die sich physisch auf Menschen ausdehnt. Die gaufrierte Bearbeitung verleiht dem Produkt eine extrem tiefe Haptik. Mit Dekor aus unterschiedlichen Formen und auf allen Seiten wird Schönheit in jeder Hinsicht geschätzt. Das Experimentieren ist für unseren Designprozess unerlässlich, und die Zusammenarbeit mit FIAM ITALIA inspiriert uns immer wieder dazu, etwas Neues zu schaffen. Ihre innovativen Glasherstellungsverfahren ermöglichen es uns, Produkte zu entwerfen, die durch die Verwendung neuer Formen ein starkes Gefühl der Illusion erzeugen. Der Kollektion zeigt, wie wir dank FIAM ITALIA durch den Einsatz von Glas Eleganz erreichen und so neue "Ufer" entdecken können, auf denen wir mit diesem magischen Material landen können”.

La forgiatura a caldo può generare leggere irregolarità e/o piccoli aloni chiari in prossimità dei decori, segni distintivi del processo di fusione ad alta temperatura che ne garantiscono l'artigianalità. Non possono quindi essere oggetto di contestazione.

Heat forging can generate slight irregularities and/or small white marks in the proximity of the decorations, distinguishing marks of the high-temperature fusion process that guarantee craftsmanship. They cannot therefore be contested.
